<div align="center">Website task</div>

In order to create my own personal website, there are several elements I need to emphasis.

- Main page (part one)
    o The main contain one of major feature of the website, these are 3 different adventures which are:
        ▪ PC
        ▪ Play Station
        ▪ Switch
    o Users can base on their interest to select different platforms, in each platform contain another 3 different features which are:
        ▪ Stream
        ▪ Videos
        ▪ Forum
    o On each platform, users can share their own experience of game and post commons and videos.
- Main page (part two)
    o Second part of the main page is the portfolio of the website, it covers through products, concept and vision of the website
        ▪ Merch
        ▪ Explore
        ▪ Vision
- About page
    o In about page contain with the information of what our website doing for the gaming community and also the environment of our company. So, on the bottom pages has some information of our core funder.
- Live chat page
    o Live chat page is a huge online chatting room, users able to through this feature to meet and team up with other users. They can also make friends on this page, there is no limitation by the languages and nations barrier.
- Contact page
    o The contact basically is the information of customer service, you can send any of the message through our email or make a phone call to the customer service. We also provide our location in case users need to send any letter to us, and provide the working time of the company.
